## Architectural Technology

Ontario College Advanced Diploma | 3 years | Optional Co-op  
Hazel McCallion Campus (Mississauga)

Scan here

**Advanced architecture education  
that's built from the ground up.**

### Build on your foundational architectural education

In your first two years, you'll learn core architecture skills such as CAD software, building and assembly systems, document preparation and envelope detailing. In your final year, you'll work with real clients in the community, train with cutting-edge software, prepare project plans and more. You'll even build a portfolio to help you find work after you graduate.

### Get paid work experience with optional co-op placements

As an Architectural Technology student, you can participate in the optional paid co-op. The co-op placement will help you gain real-life experience and make contacts in the architecture and construction industries. Previous student placements have included roles at the City of Mississauga and PCL Construction.

### Gain specialized knowledge in modern architecture practices

As you progress through your studies, you'll study specialized topics. These topics include urban design, adaptive re-use of existing structures, renovations, sustainability standards and more. Topics are frequently vetted by industry experts to ensure they're up-to-date with current construction and architecture practices.

# Career opportunities

Our students work in a variety of fields including design and drafting, construction supervision, estimating, specification writing, project management and municipal building departments. As a three-year Architectural Technology graduate, you'll have demonstrated the ability to analyze requirements, implement design, technical and/or management solutions for small construction projects and, under direct supervision, be a team member for large and complex construction projects.

## Recent graduates have moved into the following careers:

- Architectural Technician/Technologist within an architectural firm
- Specifications Writer
- Project Manager
- Site Representative/Supervisor
- Construction Manager
- General Contractor
- Estimator
- Clerk of Works

# Courses

## Some of the courses you can expect to take in your program

- Architectural Computer Visualization
- Architectural Studio
- Building Materials
- Emerging Building Technologies: Sustainable Design
- Project Management
- Theory of Structures

# Fees

Fees displayed are for the first 2 academic semesters and include tuition, health insurance and ancillary charges. These are estimates only; subject to change. See website for details.

## For Canadian students

- \$4,745.47 CAD

## For international students

- \$18,504.47 CAD

## How to apply:

5 easy steps

- 1 Find your program
- 2 Check the admission requirements
- 3 Apply online
- 4 Submit your documentation
- 5 Accept your offer

# Admission requirements

## Program eligibility

Ontario Secondary School Diploma or equivalent, including these required courses:

- One English, Grade 12 (ENG4C or ENG4U)
- plus

- One Math Grade 12 (C or U) or Math Grade 11 Functions (MCR3U) or Functions and Applications (MCF3M)

- Minimum 65% overall average

or

Mature student status.

Applicants who do not meet the admission requirements will be invited to complete pre-admission tests in mathematics and English to demonstrate proficiency.

Applicants lacking the Mathematics admission requirement for this program may wish to upgrade their Mathematics prior to application. For upgrading information, please contact us.

Applicants may also consider applying to our Technology Fundamentals program. Successful completion of this program will meet the Mathematics requirement and will provide a broader sense of the Science and Technology fields.

## Applicant selection

Eligible applicants will be selected on the basis of their previous academic achievement (the average of their six highest senior-level credits, including required courses), and/or results of pre-admission testing.

Applicants who do not meet the admission requirements for this program may be advised individually regarding other related programs.

## English language proficiency

All applicants whose first language is not English must meet Sheridan's English Proficiency Requirements.

Refer to the website for full admission requirements.
